Rafael Hahn

FULLSTACK DEVELOPER

Contact

Brazil

github.com/Arkadina

imastucia1990@gmail.com

Skills

- JavaScript & TypeScript (React.js, Next.js, React Native, Node.js, React Query)
- Python (Pandas, NumPy, Scikit-learn, PyTorch, OpenCV, IA traning)
- Kotlin (Minecraft Mod)
- Databases / SQL (PostgreSQL, Supabase, Firebase, MongoDB, Redis)

Tools

- Git
- GitHub
- Vercel
- Figma
- Docker

Languages

- Portuguese
- English

Education

Federal University of Rio Grande do Sul (UFRGS)

School of Dentistry (FO-UFRGS)

2023/1 - Present

Work Experience

Cloudsky Front-End Developer

2022 - PRESENT

- Developed responsive and interactive web applications, focusing on performance, usability, and scalability.
- Built reusable UI components and translated design concepts into functional interfaces.
- Collaborated with designers and developers to deliver intuitive and consistent user experiences.
- Integrated APIs and implemented dynamic features to enhance application functionality.
- Optimized front-end performance and resolved technical issues to ensure a seamless user experience.

Sixcry Front-End Developer

2023 - PRESENT

Opx Browser Front-End Developer

2022 - PRESENT

- Developed and improved cross-platform user interfaces using React Native, focusing on performance, responsiveness, and user experience.

Personal Projects

Highus Founder & Full-Stack Developer

2023 - PRESENT

- Designed, architected, and developed Highus, a full-stack educational platform focused on exam preparation and interactive learning.
- Built responsive and dynamic user interfaces using Next.js, React, TypeScript, and Tailwind CSS.
- Developed scalable application features, reusable components, and state management solutions using React Query.
- Designed and managed relational databases, authentication systems, and backend services using Supabase and PostgreSQL.
- Implemented REST API integrations, server-side functionality, and data management workflows.
- Automated PDF processing, image preprocessing, question segmentation, and content extraction using PyMuPDF, OCR, OpenCV.
- Integrated payment processing and subscription management using Mercado Pago, including PIX payments and multiple subscription plans.
- Implemented user engagement features, including comments, discussions, notifications, and question reporting systems.
- Managed the entire development lifecycle, from product conception and UI/UX design to implementation, deployment, and ongoing maintenance.

Published Works

Using of artificial intelligence to evaluate image quality for interproximal bone level assessment on bitewing radiographs

Artificial intelligence for the detection of the palatoglossal airspace in panoramic radiographs: a diagnostic support tool

- Conducted research applying artificial intelligence and deep learning techniques to dental radiology.
- Developed and evaluated machine learning and deep learning models for automated analysis and classification of dental imaging data.
- Applied computer vision techniques to process, preprocess, and analyze radiological images using Python.
- Contributed to scientific writing, data analysis, interpretation of results, and publication of research findings in dental radiology.
